HILTON WIND FARM
PUBLIC EXHIBITIONS

Proposed Wind Farm South of the Lochore Meadows Country Park

Amec Foster Wheeler is holding a series of public exhibitions to outline plans for a proposed wind farm development to the south of the Lochore Meadows Country Park.

The public exhibitions will provide the opportunity to find out more about the project and meet our team. It will also allow us to listen to your views on the proposal and to answer your questions.

Everyone from the local community is invited to come along.

See overleaf for more information.
About Us:

Amec Foster Wheeler is a supplier of consultancy, engineering and contract management services to the world’s energy, environment and infrastructure markets. In the UK, we have been active in consenting over 1.5GW of onshore and offshore wind projects over the last 15 years.

The Proposed Wind Farm:

We are proposing to erect 6 turbines, 100m tall to tip height on a site at Hilton of Beath Farm to the east of Kelty and just to the south of the Lochore Meadows Country Park.

The wind farm would have a capacity of up to 14.1 MW which would be expected to generate an estimated 31.75 GWh of electricity per year. This is the equivalent amount of electricity used annually by 9,922 homes.

Community Benefit and Shared Ownership:

This project will deliver an annual community fund of up to £70,500 which can be used for local projects to support the communities around the wind farm. It is likely that this fund will be managed by a Community Trust run by representatives from the local area.

In addition to the annual fund, Amec Foster Wheeler are offering shared-ownership of the wind farm so that the communities surrounding the wind farm can own part of the project. This share is likely to be the equivalent of one of the turbines. By enabling the community to invest in, and have part-ownership of the wind farm, the local community will be able to share in the revenue from the project over the next 25 years. We are currently in discussions with the local community councils about this option.
